EXPERIENCE

InAmigos Foundation

June 2026 – July 2026

AI Data Analytics Intern | GitHub Project

- Cleaned and analyzed 3+ NGO datasets using AI-assisted analytics techniques, improving data accuracy and consistency for downstream reporting.
- Developed analytical report and 3+ interactive dashboards using Bolt.new, enabling data-driven decision-making for NGO stakeholders and improving reporting efficiency..
- Leveraged AI-powered tools to automate organizational data analysis, reducing analysis time by 40% and identifying actionable insights to support strategic decision-making.

Tensorik

March 2026 -May 2026

Operation Member

- Coordinated operational activities across 2+ teams, ensuring timely completion of assigned deliverables.
- Analyzed operational data to identify process inefficiencies of around 30+ workflows, contributing recommendations that improved internal workflows.

Torii Minds

Feb 2026 -May 2026

Salesforce Trainee

- Collaborated with team members to actively learn and implement Salesforce CRM concepts—such as Leads, Accounts, Contacts, and Opportunities—resulting in streamlined processes for 2 projects..
- Crafted Salesforce Lightning report and interactive dashboard to track key CRM performance metrics.

PROJECTS

Human-in-the-Loop AI Sales Automation Agent | n8n, Google Gemini, AI Automation

2026

- Designed and built a Human-in-the-Loop AI sales-email automation workflow using n8n and Google Gemini, reducing manual email drafting effort.
- Automated end-to-end lead management, including AI-generated email drafting and approval routing, reducing manual processing time by 60% .
- Integrated Google Sheets, Gmail, AI Agents, and human-approval checkpoints to improve efficiency and communication quality.

CRM Analysis for Marketing Campaign | Data Analysis,Machine Learning, Tableau

2025

- Performed end-to-end CRM analytics by analyzing customer behavior, segmenting customers, and identifying key factors influencing marketing campaign success.
- Developed a predictive classification model to identify customers most likely to respond to future marketing campaigns, supporting data-driven decision-making and marketing ROI optimization.

Multimodal Deep Learning for Cloud Removal in Satellite Imagery

Ongoing 2026

- Developing a GAN-based deep learning model in PyTorch to remove cloud cover from satellite imagery.
- Integrating Sentinel-1 (SAR) and Sentinel-2 (optical) datasets for cloud-free image reconstruction.

TECHNICAL SKILLS

Languages & Querying: Python, C++, SQL

Databases: MySQL, MS SQL Server

Data Analytics: MS Excel, Tableau, Data Cleaning, Exploratory Data Analysis (EDA), Data Visualization, Decision Making

AI & Automation: Machine Learning, Prompt Engineering, n8n

Tools : Github, Jupyter Notebook

Documentation : Research, Project Collaboration, Technical Documentation

Soft Skills: Communication, Time Management,Teamwork, Problem Solving

EDUCATION

Nagarjuna College of Engineering and Technology (NCET)

Bengaluru, Karnataka

Bachelor of Engineering in Computer Science and Engineering

October 2023 – Ongoing

CGPA: 9.31

Janatha Independent PU College

Udupi, Karnataka

PCMC

2021 – 2023

Percentage: 94.16 %

CERTIFICATIONS

- Oracle Data Science Professional
- AWS Foundations of Prompt Engineering
- NPTEL Machine Learning
